

AGRICULTURAL ENGINEERING

The Journal of the

American Society of Agricultural Engineers

Index to Volume 6—January to December, 1925

| 1925 | Pages | DeBaufre, W. L.—The fundamentals of research | 161 | Some agricultural engineering problems of Western irrigation (S. H. Beckett) | 228 |
|---|---------|---|-----|---|-----|
| January | 1-24 | | | Research, 1924-25 (R. W. Trullinger) <td>236</td> | 236 |
| February | 25-48 | Drainage | | The problems of federal reclamation (Elwood Mead) | 260 |
| March | 49-72 | Leaching farm lands on the Rio Grande project (G. A. Altgelt) | 131 | A new idea in drainage for the irrigation farmer (J. C. Marr) | 306 |
| April | 73-96 | An example of waste in tile drainage | 133 | | |
| May | 97-120 | Research, 1924-25 (R. W. Trullinger) | 237 | Josephson, H. B.—Research in power and labor problems | 275 |
| June | 121-144 | Duties of the state in public drainage proceedings (E. V. Willard) | 271 | Kelley, M. A. R.—A method of analysis of ventilation test data | 209 |
| July | 145-176 | A new idea in drainage for the irrigation farmer (J. C. Marr) | 306 | Factors influencing flue velocities in barn ventilation | 303 |
| August | 177-200 | Some practical research in concrete drain tile | 309 | Kranich, F. N. G.—The power take-off for tractors | 204 |
| September | 201-224 | | | Land Economics, The Relation of the Agricultural Engineer to (R. T. Ely and G. S. Wehrwein) | 188 |
| October | 225-256 | Educational | | Land Reclamation (See Reclamation) | |
| November | 257-288 | Establishing a professional agricultural engineering course (H. B. Roe) | 298 | Long, J. D.—The use of earth for wall construction | 148 |
| December | 289-320 | Electricity | | Lugs, Tractor | |
| Agricultural Engineering (Agricultural Engineers) | | Demonstration of an electric farm (R. U. Blasingame and E. G. Lantz) | 57 | A method of studying soil stresses (M. L. Nichols and J. W. Randolph) | 134 |
| Evolution and progress of agricultural engineering at the agricultural experiment stations (R. W. Trullinger) | 14 | Rural electric investigations in California (B. D. Moses) | 154 | Machinery (Mechanical Equipment) | |
| The relation of the agricultural engineer to land economics (R. T. Ely and G. S. Wehrwein) | 188 | Making field electric tractor more portable (O. K. Howe) | 184 | (See also Cleaning, Grain; Combines; Ensilage Cutters; Plows; Standardization; Tractors) | |
| European observations of an agricultural engineer | 268 | Rural electric service costs (E. A. Holloway) | 230 | The menace of foreign agricultural competition (A. P. Yerkes) | 28 |
| American Society of Agricultural Engineers | | A study of the isolated farm electric plant (D. C. Heitshu and F. M. Sommerville) | 292 | A mechanical manure loader (E. R. Wiggins) | 79 |
| The president's annual address (H. B. Walker) | 158 | Relation of electric power development to the farm equipment industry (O. B. Zimmerman) | 301 | The problem of research in farm equipment (R. W. Trullinger) | 214 |
| Allen, E. W.—The publication of research | 105 | Apply electricity to agriculture (M. H. Aylesworth) | 302 | Research, 1924-25 (R. W. Trullinger) | 235 |
| Altgelt, G. A.—Leaching farm lands on the Rio Grande project | 131 | Ely, R. T.—The relation of the agricultural engineer to land economics | 188 | Relation of electric power development to the farm equipment industry (O. B. Zimmerman) | 301 |
| Aylesworth, M. H.—Applying electricity to agriculture | 302 | Engineering Service, An Outstanding (Herbert Hoover) | 58 | Manure Loader, A Mechanical (E. R. Wiggins) | 79 |
| Bamboo, Transverse Strength of Structural (A. L. Teodoro) | 266 | Ensilage Cutters (Silo Fillers) | | Marr, J. C.—A new idea in drainage for the irrigation farmer | 306 |
| Beckett, S. H.—Some agricultural engineering problems of Western irrigation practice | 228 | Efficiently filling the silo (F. W. Duffee) | 4 | MacGregor, W. F.—The combined harvester-thresher | 100 |
| Black, R. H.—Grain cleaners in heavy dockage areas | 180 | Cutting corn in the field or at the silo (J. D. Parsons) | 13 | Mead, Elwood—The problems of federal reclamation | 260 |
| Boyd, Geo. R.—The value of the distribution of surplus war explosives | 233 | Erosion, Soil (Terracing) | | Meetings (A.S.A.E.) | |
| Brown, Theo—Some fundamentals of plow design | 124 | A model to promote soil erosion control | 108 | Pacific Coast Section meeting | 19 |
| Buildings | | Explosives | | Tractor meeting at Chicago | 114 |
| (See also Crop Storage; Fire Prevention; Heating; Ventilation) | | Meeting on pyrotol distribution | 153 | North Atlantic Section organization meeting | 115 |
| The construction of twin storage cellars (N. S. Grubbs) | 130 | The value of the distribution of surplus war explosives (G. R. Boyd) | 233 | Southwest Section organization meeting | 128 |
| The use of earth for wall construction (J. D. Long) | 148 | Farm Machinery (See Machinery) | | Pacific Coast Section meeting | 138 |
| Farm structures—maximum results at minimum cost (M. E. Cook) | 185 | Farm Power (See Power) | | The 19th annual meeting | 167 |
| Research, 1924-25 (R. W. Trullinger) | 236 | Farm Structures (See Buildings) | | Moses, B. D.—Rural electric investigations in California | 154 |
| Carter, D. G.—Major problems in a study of the irrigation of rice by pumping | 37 | Fire Prevention (Protection) | | Murphy, R. E.—Operating an Iowa farm without horses | 59 |
| Cleaning, Grain | | Fire protection and prevention (editorial) | 179 | Nichols, M. L.—The sliding of metal over soil | 80 |
| Grain cleaners in heavy dockage areas (R. H. Black) | 180 | Fire protection and prevention (editorial) | 203 | A method of studying soil stresses | 134 |
| Clearing, Land | | Foreign Agricultural Competition, The Menace of (A. P. Yerkes) | 28 | Parsons, J. D.—Cutting corn in the field or at the silo | 13 |
| (See also Explosives) | | Grubbs, N. S.—The construction of twin storage cellars | 130 | Pise de Terre (See Rammed Earth Construction) | |
| Research, 1924-25 (R. W. Trullinger) | 237 | Heating | | Plows (Plowing) | |
| Colonization, Land | | Proper installation for warm air heating (E. A. Stewart) | 52 | The sliding of metal over soil (M. L. Nichols) | 80 |
| The Durham state land settlement as an object lesson in agricultural engineering (David Weeks) | 263 | Heitshu, D. C.—A study of the isolated farm electric plant | 292 | Some fundamentals of plow design (Theo Brown) | 124 |
| Combines (Combined Harvester-Threshers) | | Hoffman, A. H.—A thresher for single heads of grain | 297 | Power | |
| The combined harvester-thresher (W. F. MacGregor) | 100 | Holloway, E. A.—Rural electric service costs | 230 | Research, 1924-25 (R. W. Trullinger) | 235 |
| The combine in the corn belt states (J. C. Wooley) | 103 | Holt, P. E.—The development of the track type tractor | 76 | Research in power and labor problems (H. B. Josephson) | 275 |
| Cook, Max E.—Farm structures—maximum results at minimum cost | 185 | Irrigation | | Rammed Earth Construction | |
| | | Major problems in a study of the irrigation of rice by pumping (D. G. Carter) | 37 | The use of earth for wall construction (J. D. Long) | 148 |
| | | Leaching farm lands on the Rio Grande project (G. A. Altgelt) | 131 | | |

| | | | | | |
|--|-----|---|--------|--|--------|
| Randolph, J. W.—A method of studying soil stresses | 134 | Soil Colloids and Tillage (R. W. Trullinger) | 61, 84 | The development of the track type tractor (P. E. Holt) | 76 |
| Reclamation, Land | | Soil Dynamics | | The power take-off for tractors (F. N. G. Kranich) | 204 |
| (See also Clearing; Colonization; Drainage; Erosion; Irrigation) | | The sliding of metal over soil (M. L. Nichols) | 89 | A.S.A.E. tractor testing and rating code | 212 |
| National reclamation (editorial) | 3 | A method of studying soil stresses (M. L. Nichols and J. W. Randolph) | 134 | Trullinger, R. W.—Evolution and progress in agricultural engineering at the agricultural experiment stations | 14 |
| Geared to his job (editorial) | 3 | Soil Erosion (See Erosion) | | Soil Colloids and tillage | 61, 84 |
| The problems of federal reclamation (Elwood Mead) | 260 | Standardization (Standards) | | The problem of research in farm equipment | 214 |
| A proposed inventory of water resources | 295 | A.S.A.E. tractor testing and rating code | 212 | Agricultural engineering at the experiment stations | 235 |
| Research | | Stewart, E. A.—Proper installation for warm air heating | 52 | Ventilation | |
| The publication of research (E. W. Allen) | 105 | Storage, Crop | | A method of analysis of ventilation test data (M. A. R. Kelley) | 209 |
| The fundamentals of research (W. L. DeBaufre) | 161 | The construction of twin storage cellar (N. S. Grubbs) | 139 | Factors influencing flue velocities in barn ventilation (M. A. R. Kelley) | 375 |
| U.S.D.A. advisory council on research | 163 | Common storage for Eastern apple growers (J. L. Strahan) | 264 | Walker, H. B.—The president's annual address | 158 |
| Fundamental research in agricultural engineering and the Purnell Bill (R. W. Thatcher) | 191 | Strahan, J. L.—Common storage for Eastern apple growers | 264 | Weeks, David—The Durham state land settlement as an object lesson in agricultural engineering | 263 |
| The problem of research in farm equipment (R. W. Trullinger) | 214 | Teodoro, A. L.—Transverse strength of structural bamboo | 266 | Wiggins, E. R.—A mechanical manure loader | 79 |
| Agricultural engineering at the experiment stations (R. W. Trullinger) | 235 | Terracing (See Erosion) | | Willard, E. V.—Duties of the state in public drainage proceedings | 271 |
| Research in power and labor problems (H. B. Josephson) | 273 | Thatcher, R. W.—Fundamental research in agricultural engineering and the Purnell Bill | 191 | Wooley, J. C.—The combine in the corn belt states | 103 |
| Some practical research in concrete drain tile | 309 | Thresher for Single Heads of Grain, A (A. H. Hoffman) | 297 | Yerkes, A. P.—The menace of foreign agricultural competition | 28 |
| Roe, H. B.—Establishing a professional agricultural engineering course | 298 | Tillage, Foil Colloids and (R. W. Trullinger) | 61, 84 | Zimmerman, O. B.—Relation of electric power development to the farm-equipment industry | 301 |
| Rural Electrification (See Electricity) | | Tractors | | | |
| Sanitation (See Heating; Sewage Disposal; Ventilation) | | (See also Lugs) | | | |
| Scoates, D.—European observations of an agricultural engineer | 268 | Operating an Iowa farm without horses (R. E. Murphy) | 59 | | |
| Sewage Disposal | | | | | |
| Research, 1924-25 (R. W. Trullinger) | 234 | | | | |
| Silage Cutters (See Ensilage Cutters) | | | | | |
